Allowable Subject Matter

 - claims 1-20 are allowed;

the first terminal with a reply message, the reply message having a description about detected translations made by intermediate computers disposed between the new network address of the first terminal and the network address of the second terminal and/or encapsulation methods supported by the second terminal" in combination with the other limitations recited in independent claim 1;

- claims 2-20 are allowed because of their dependence from independent claim 1.
